The ideal of the School of Metaphysics is to aid any individual, willing to put forth the effort, to become a whole functioning self not dependent on any person, place or thing for peace, contentment or security.

The purpose is to accelerate the evolution of humanity by ushering in Intuitive, Spiritual Man.

The School of Metaphysics is a 501(c)(3) not-for-profit educational organization serving humanity since 1973.
The only prerequisite for this course is a desire and willingness to change.

This study is about the most fascinating person in the universe....YOU!
It is a progressive, thought-provoking, challenging, and exciting odyssey that respects you as the driving force of your progress. In a quantum universe, everything begins and ends with you.

The First Cycle of SOM Lessons is available through correspondence as a Self-guided study. This cycle introduces you to the Universal Laws that govern creation and teaches ways to live in harmony with these Laws. This ancient wisdom, openly available to anyone, enables you to apply metaphysics in your daily life for Self awareness and Enlightenment.

The coursework includes learning meditation, principles of permanent healing, visualization, re-energizing mind and body through understanding life force energies and chakras, and aligning with Universal Laws and Truths. Understanding and interpreting dreams is a major area of concentration in our study. Correspondence students are automatically enrolled in the Dreamschool Scholar Program. This program offers in-depth study of dreams beyond what the student receives in the correspondence course.

As long as you study with us you will have a teacher. He or she is an advanced student in the College of Metaphysics residency program who has learned and applied the lessons you will be studying. Your teacher guides your learning when you most need it, while providing support for your independent efforts. This is a beautiful way to learn mind-to-mind connection (telepathy) accelerating your soul progression. You will correspond weekly, by email and google chat, with your teacher who will monitor your progress, answer questions on content and practices, and forward new lesson materials to you. Weekly webinars in our on-line Virtual Classroom are an open real-time forum to interact with Dream Interpretation Coaches and our most seasoned Psi Counselors and teachers.

In our lessons, a distinction is made between concentration and meditation. Concentration consists of trained attention freed from distractions and focused on your chosen interests. Meditation is a special form of concentration in which the attention has been liberated from restlessness and focused on listening to your Higher Self or the Creator. Meditation is concentration used to expand Self awareness of your relationship with your inner Self and all of creation. Ultimately, meditation is a going within to the inner levels of consciousness, an attunement and alignment of the entire being to the Creator within Self. The first two stages of meditation - expectant listening and expectant observation - are practiced during the first cycle of lessons.

As a student you read and study a lesson and practice spiritual disciplines each day. The lessons are sent by your teacher as you are prepared to receive the sequential material. The lessons are designed to cooperate with the practices, so performing your mental exercises and spiritual disciplines daily is a requirement for continuing in the classes. We expect you to fulfill the same requirements of all students studying in the School of Metaphysics.
At the completion of your studies you may elect to receive a Certificate of Completion or to earn a Respondere degree. To earn the Respondere degree, you spend some time fulfilling practicum and laboratory experiences at the World Headquarters of the School of Metaphysics located on the campus of the College of Metaphysics. This enables you to live in the presence of your teacher and apply the principles and metaphysical knowledge you've gained in your life with others who are doing the same.

Students are always welcome at SOM branches and at headquarters on the College of Metaphysics campus. Several weekends are set aside each year for students to convene on campus. This is particularly helpful for those studying through correspondence for it offers a wide variety of stimulus, inspiration, experience, and understanding through interaction and activities. You will make spiritual friendships that can last lifetimes!

Registration and Class Structure

Enrollment is secured through completing the Registration Form (page 9) and making payment to the SCHOOL OF METAPHYSICS through money order or credit card. The tuition is $2000.00. This is non-refundable. Books can be purchased all at once (around $160.00 plus shipping) or as they are assigned with your classwork.

Upon enrollment students are paired with a teacher. An introductory phone call gets things started by establishing a regular class day and time that works for both people. Most exchanges are made through emails and weekly face to face classes on google chat.

Dream study is an integral part of the metaphysics class. Correspondence students are granted full membership to www.dreamschool.org and are enrolled in the Dreamschool Scholar Program concurrently with the applied metaphysics lessons. These include:

   Level I: Course 140: Dream Theory and Experience begins your practice in remembering and logging dreams. The theory we teach is Mind Linguistics, how and why Mind communicates. This is a practical study you will use every day the rest of your life.

   Level II: Course 210: Mind Linguistics and Understanding delves into the people, places, and things that appear in your dreams – what they mean and why.

   Level III: Course 260: Dream Themes and Interactions explores the development of motifs and the power of universal archetypal images as the conveyers of Self-revelatory messages carrying significance for the individual dreamer

We expect the complete course to take 18-24 months to complete, the exact timing depends upon the student's comprehension and application of the material.

You will need access to a computer with the following requirements to participate in this Correspondence Class:

   **System Requirements**
   - PC-based attendees
     Required: Windows® 8, 7, Vista, XP or 2003 Server
   - Mac®-based attendees
     Required: Mac OS® X 10.6 or newer
   - Mobile attendees
     Required: iPhone®, iPad®, Android™ phone or Android tablet
FIRST CYCLE SYLLABUS

Lesson 1 The Quest for Enlightenment
How Much You are Worth Depends on What You Value, The Power of Attention

Lesson 2 Education for the Third Millennium
Stranger in a Strange Land, The Secret Place, Becoming SuperConscious

Lesson 3 The Energizing Faculty of Creation
Will Power occurs when Freedom and Responsibility become One, Living in Harmony with our Universe, Preparing the Mind for Infinite Intelligence

Work of the Soul - ed., Dr. Barbara O’Guinn Condron

suggested reading:

Permanent Healing - Dr. Daniel Condron
Isaiah 55 Interpreted and Explained - Dr. Daniel Condron
Matthew Interpreted in Dream Symbols - Dr. Daniel Condron
The School of Metaphysics logo

is a composite of familiar symbols you may recognize from many schools of thought. The inner circle signifies the individuality, the spark of life from our Creator. The light and dark areas within the circle, reminiscent of the yin-yang symbol, represent the aggressive and receptive qualities in balance. The triangle pointing upward illustrates the trinity found in all esoteric and Holy scriptures of the world, the structure of consciousness from its spiritual origin to its physical expression. The downward triangle indicates Spirit entering matter, the creative manifestation of thought. Together, these triangles form the seal of David, the five physical senses unified by the mental sense of attention. The three circles outside the six-pointed star represent the conscious mind, the subconscious mind, and the superconscious mind, respectively. The four bars between the first and second circles form a cross marking the directions of the earth, and signifying the challenges and stages of man. The marks leading to the third circle represent the twelve aspects of man needed for Self mastery. The outer circles symbolizes the relationship between man and the outer universe. The rays represent the twelve Zodiacal influences which serve as indicators of the soul’s assignment for enlightenment in the present lifetime. The combination of these universal symbols represents the whole and complete individual - a unified image of the Self.

We look forward to hearing from you!
